

Contents

Chapter I

Some considerations on perpendicular to grain stress in double-tapered glulam beams9

Anna AL SABOUNI-ZAWADZKA, Wojciech GILEWSKI, Jan PEŁCZYŃSKI

Chapter II

Contact mechanics modelling of modern timber connections.....19

Arkadiusz LEŚKO

Chapter III

Nonlinear interaction analysis of RC cylindrical tank with soil.....35

Paweł M. LEWIŃSKI, Sławomir DUDZIAK

Chapter IV

The influence of self-stress on the behavior of tensegrity-like real structure.....55

Wojciech GILEWSKI, Joanna KŁOSOWSKA, Paulina OBARA

Chapter V

Building Energy Software: Comparison of Energy 3D and Energy Plus Computations.....65

R. Robert GAJEWSKI, Tomasz KUŁAKOWSKI, Paweł PIENIĄŻEK

Chapter VI

A plasticity model of soils with a single loading surface and different porosity77

Sergii KLOVANYCH, Leszek MAŁYSZKO

Chapter VII

A new smooth Drucker-Prager type plastic potential for concrete and soil.....93

Inez KAMIŃSKA, Aleksander SZWED

Chapter VIII

Finite strain elasto-plasticity without yield surface: application to metallic and polymeric materials.....105

Cyprian SUCHOCKI, Rafał MOLAK

Chapter IX

Modelling of pseudo-hyperelastic response of rubberlike materials.....119

Stanisław JEMIOŁO, Łukasz KOWALEWSKI

Chapter X

An overview of pneumatic-cable structures for civil engineering applications.....133

Marta BIERNACKA, Wojciech GILEWSKI
